# YaraMila<sup>®</sup> MINIPRILLS<sup>™</sup> 21-7-14

Professional Grade "Mini" Fertilizer			
Total Nitrogen (N)	21.0%	Avail. Phosphate (P <sub>2</sub> O <sub>5</sub> )	7.0%
Nitrate N (NO <sub>3</sub> )	9.9%	Soluble Potash (K <sub>2</sub> O)	14.0%
Ammoniacal N (NH <sub>4</sub> )	11.1%	Sulfur (S)	5.1%
SGN	170		
Derived from: DAP, MAP, Ammonium Nitrate, Calcium Phosphate and SOP			

YaraMila MINIPRILLS 21-7-14 takes sports turf fertility to the next level. It provides complete, high-performance turf nutrition in a new, smaller prill (SGN 170).

#### The Advantages Are Clear:

- MINIPRILLS is consistently sized to offer more prills per square foot: Even coverage means no color mottling, no burns.
- Homogenous Prills provide no segregation of nutrients, feeding turf accurately and uniformly for even growth - no "hot spots".
- A low irrigation volume is required to water in completely with no need to close the fertilized area for play after application.

#### Split Nitrogen – Fast Response & Sustained Feeding

MINIPRILLS supplies nitrate nitrogen for quick green-up even in cool weather, and ammonium nitrogen for sustained feeding.

#### High Analysis

MINIPRILLS 21-7-14 contains 47% plant nutrients! P and K strengthen roots and increase tolerance to drought, disease, and traffic. Sulfur supports proper turf establishment and rich, even and sustained greening.

The information provided is accurate to the best of Yara's knowledge and belief. Any recommendations are meant as a guide and must be adapted to suit local conditions.

#### Advantages for the Landscape Professional

- Homogenous, dust free prills with ideal N-P-K-S ratio for high performance sports turf.
- "Mini" sized (SGN 170) for very uniform coverage and rapid watering-in.
- High concentration, with 2 types of nitrogen: Nitrate for quick response and Ammonium for lasting feeding.
- Low salt index, very safe for turf.
- Easy and accurate calibration.

## Recommendations:

### Turfgrass:

Established Turf: Broadcast 5 pounds of YaraMila MINIPRILLS 21-7-14 per 1,000 square feet. Apply irrigation to dissolve fertilizer and incorporate into turfgrass rooting zone.

Coverage: 10,000 sq.ft./50lbs. bag.

### Overseeding:

Broadcast 4 pounds of YaraMila MINIPRILLS 21-7-14 per 1,000 square feet. Water in immediately after seeding.

### Broadleaf coverage:

At the beginning of the growing season and again halfway through, broadcast 4-5 pounds of YaraMila MINIPRILLS 21-7-14 per 1,000 square feet. Wash any fertilizer prills off the foliage immediately to prevent spotting.

Note: Bulk density approximately 65 lbs/ft<sup>3</sup>.

CAUTION: Keep out of reach of children and pets.

## Suggestions for use

- Apply when foliage is dry and soil moist.
- Apply with well maintained equipment for even distribution and optimum results.
- Water immediately after application to wash foliage and carry fertilizer into the soil.
